OysterGro®

Our passion is your success!

How?

- Growing oysters faster
- Efficiently controlling biofouling
- Decreasing mortality
- Desirable shape with deep cup

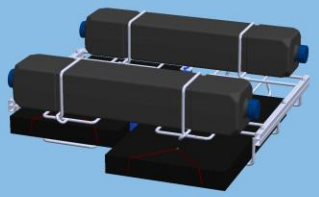

OysterGro

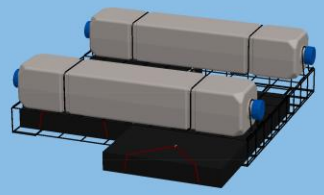

What is OysterGro?

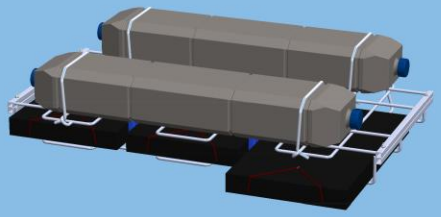

- Proven oyster farming system
- 20+ years of experience
- Delivered in a variety of configurations
- Manufactured at our facility

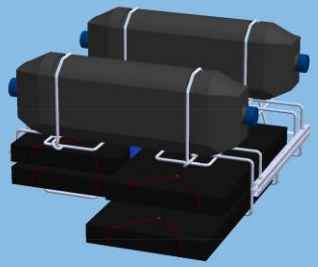

2-bag to 9-bag configurations

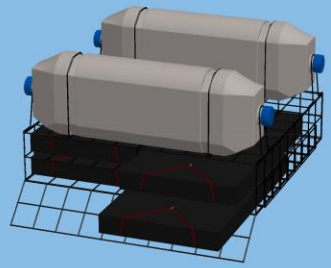

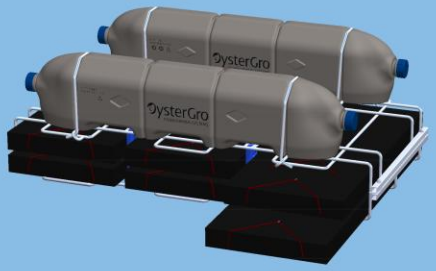

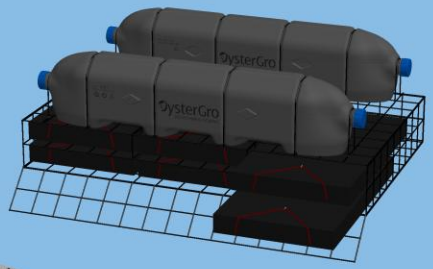

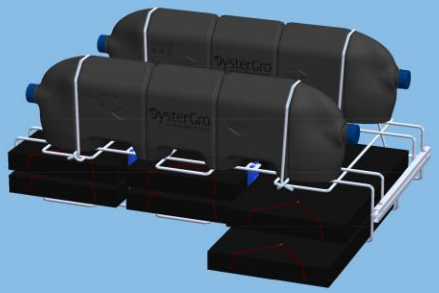

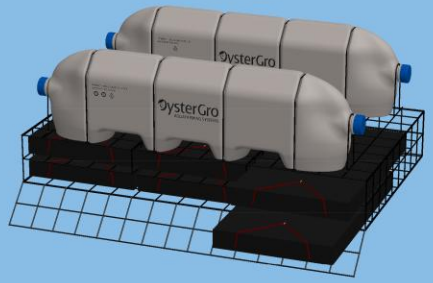

- Wire mesh
- Aluminum

OysterGro

How do you create a deep cupped oyster?

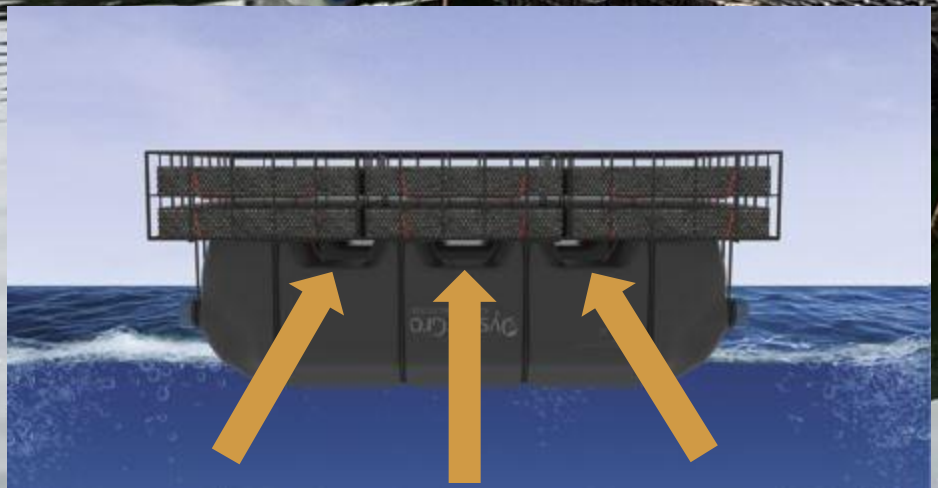

Wave action combined with cage design

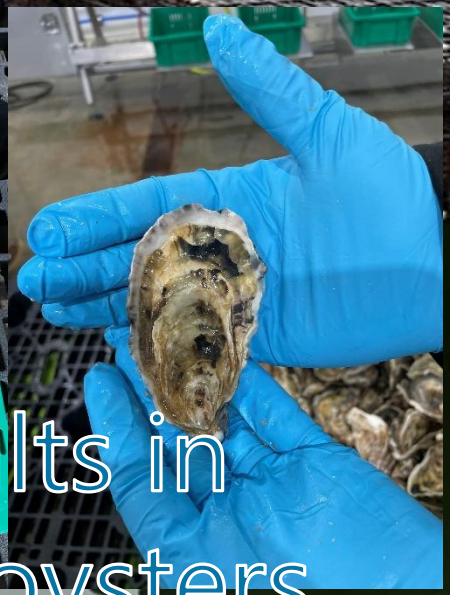

What about biofouling control?

OysterGro

- Flipping cage
- Built-in flow channels

Results in clean oysters

How do we minimize oyster mortality?

- Controlling desiccation cycles
- Protection from summer heat waves
- Oysters are free to move, without getting stuck in corners

Storm Protection

- Engineered for 365-day use
- Careful selection of engineered materials
- Cages are reinforced in strategic locations
- Double crop protection

Sinking Cages For Storm Avoidance

OysterGro

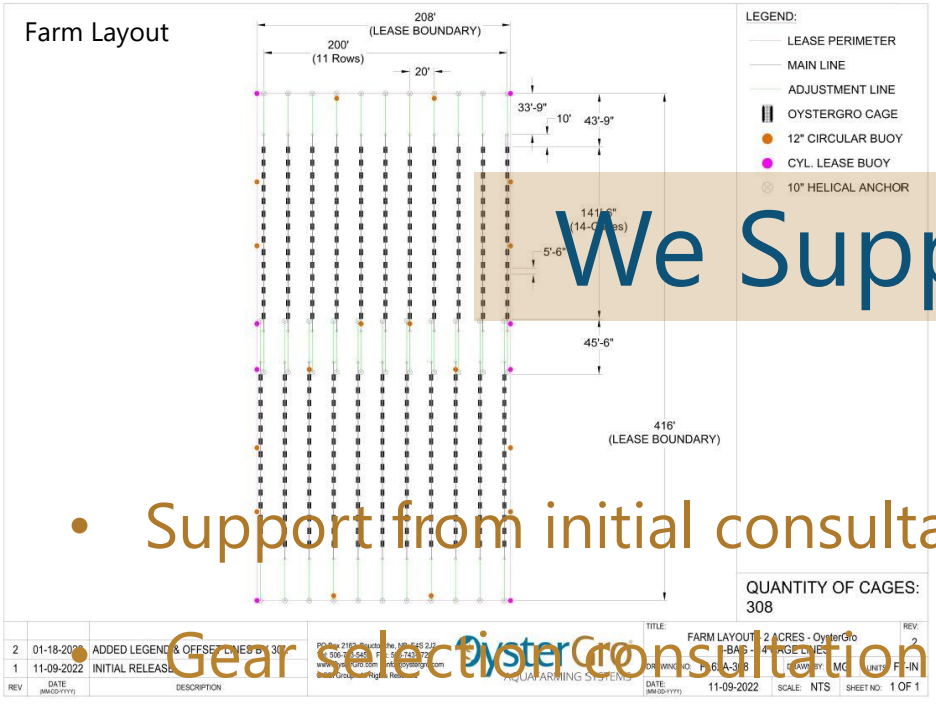

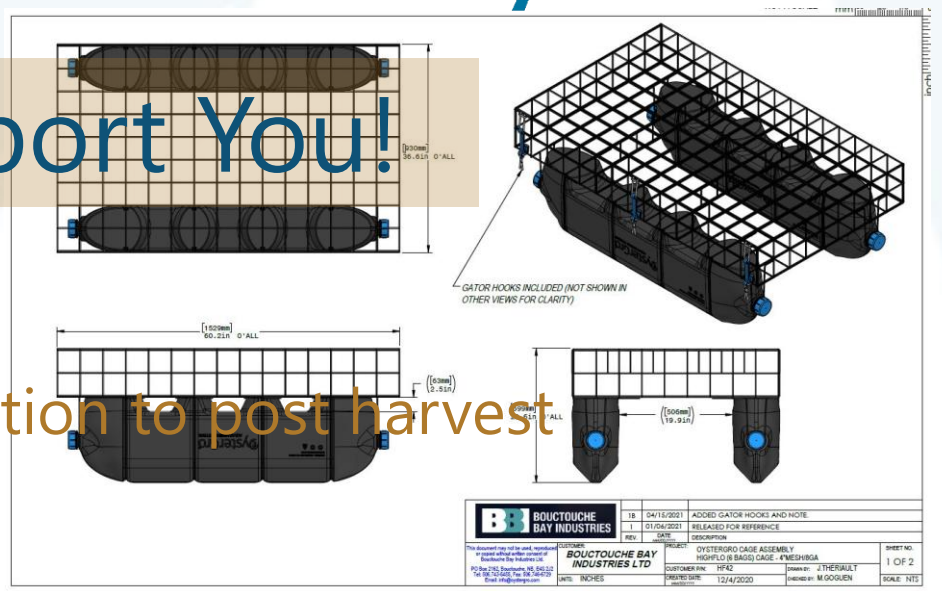

If you experience severe storms or sea ice in your area, you'll need to submerge the units for protection, which is a simple process, especially compared to labor-intensive equipment retrieval and storage.

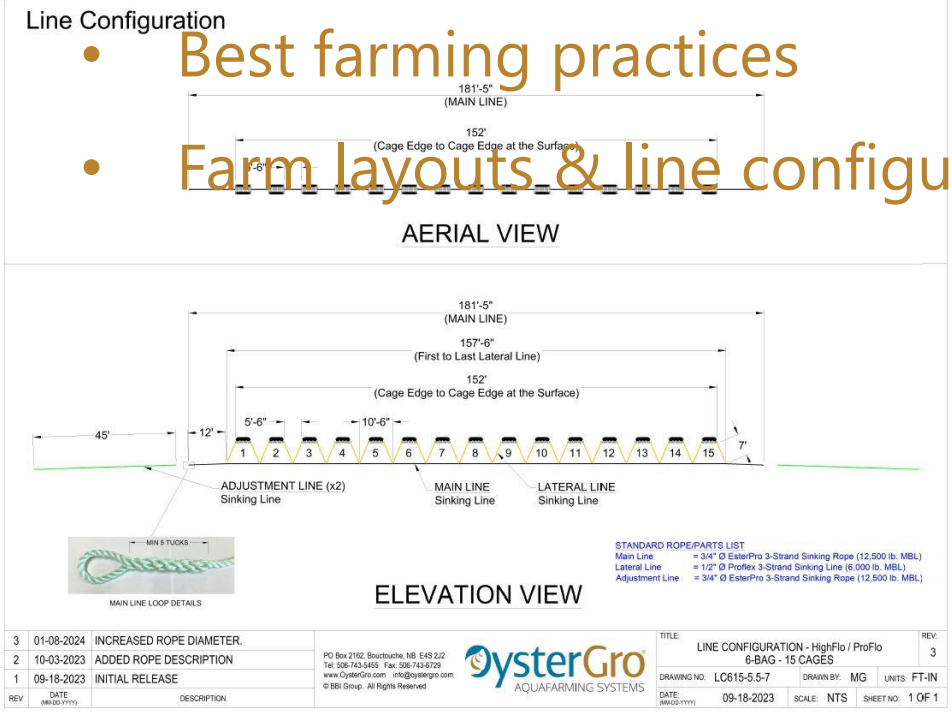

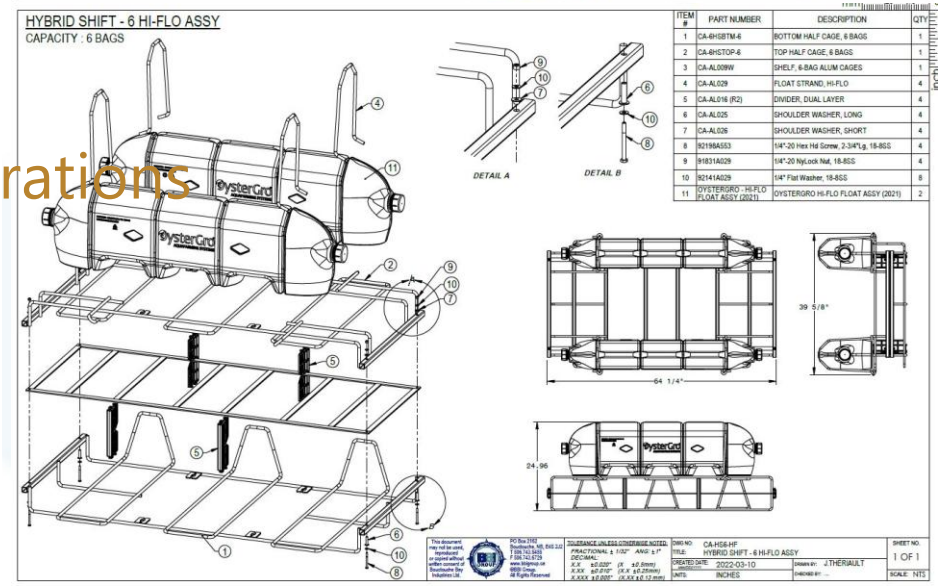

We Support You!

- Support from initial consultation to post harvest
- Gear selection consultation
- Best farming practices
- Farm layouts & line configurations

From raw materials to finished product

What our OysterGro farmers think

"We've tried other systems and nothing comes close. In a nutshell OysterGro® is by far the best farming system out there"

"OysterGro® has been a great building block for our business we ordered our first OysterGro® systems just over 14 years ago and have never looked back since"

"More of a partner than just a supplier, they are always thinking ahead and making improvements. OysterGro® is a quality system backed by a strong service"

OysterGro®
